### Graduate Program in Critical Disability Studies Course Typology

|                     |  |
|---------------------|--|
| <b>Core*</b>        | <p>Core courses ensure that all graduate students gain a common and foundational understanding of the different aspects of critical disability studies and are REQUIRED courses.</p> <p><i>Note: Upon discussion with and approval of GPD, Methodology can be replaced with equivalent credits if a student completed an equivalent graduate level research methods course</i></p>   |
| <b>Elective ***</b> | <p>All students must take a certain number of elective credits that depend on DEGREE PURSUED (MA or PhD) and ADMISSIONS CATEGORY IN THE CASE OF PHD STUDENTS (e.g., accepted for PhD with an MA from York Graduate Program in Critical Disability Studies, an MA from another program, or non-standard applicant).</p> <p>Students are encouraged to take a maximum of one 3.0 credit course elective (or two for PhD students with a York MA in Health) from another graduate program at York, contingent on student's specific intellectual/research interests, upon discussion with and approval of supervisor and GPD.</p> |
